‘Dreams and wishes are harbingers of special abilities’,

Johann Wolfgang von Goethe once said. In the spirit of the German poet, Klax offers so-called clubs in the afternoons to supplement the compulsory curriculum, in which pupils can further develop their special interests and talents.

Findings from neurobiology confirm that consistently supporting talent and interests also has a positive effect on compulsory subjects. Clubs are therefore not intended for entertaining leisure activities but for performance-orientated support activities which the students can choose themselves.

Comprehensive Education

Children can discover and realise their talents and potential in the clubs, making them an indispensable addition to our school concept. The children acquire important skills through creative activities and practical challenges.

Varied Range of Activities

In order to do justice to the individual inclinations and talents of the children, there is a need for a wide range of options, ranging from clubs in the arts and physical exercise, to natural science courses in the sense of exploratory and research-based learning. The activities are reorganised each term, depending on the season and demand.

Choice

In the last week of the first semester, the sign up process for the second semester takes place. The students must choose 2 clubs; they can continue their existing courses or try a new club. The confirmation of the clubs is made by the class teacher when the 2nd semester starts; the clubs then start in the 2nd week. Organisational questions about club participation can be clarified in the first week, if necessary.

Please support your child in choosing clubs but do not force them to attend a particular club.

We wish you and your child interesting discussions about the club selection.

Head of Club Line, Heiko Mattschull

Wednesday, Gym

Breakdance

As a B-Boy or B-Girl you will get to know the oldest and at the same time most spectacular form of hip-hop dance in the form of breakdancing. Toprock, Uprock, Freeze or Footwork will become familiar dance moves as you learn the basics and tricks of the block party scene.

You will ...

- learn the basic steps as well as acrobatic elements of breakdancing
- improve your athletic ability
- develop self-confidence

Instructor: Yassine Ahbar

Wednesday, Room 225

Contemporary & Creative Children's Dance

Do you enjoy dancing? Then join in! In the course 'Contemporary & Creative Children's Dance' you will learn many different ways to dance. Furthermore, we play with our own creativity and think of ways that we can move together – there are almost no limits! Together we also learn a little choreography that the whole group can perform together. Have fun, be imaginative and dance with us!

You will ...

- learn different dance styles
- improve your sense of rhythm
- develop your own creative choreographies

Instructor: Liboa Kaszemeik

Tuesday, Room 225

Kids Yoga

Controlled breathing, tension, relaxation and agility – these are just the corner-stones that you will learn at the Kids Yoga Club. You will immerse yourself into the world of self-awareness, increase your concentration and become conscious of proper posture.

You will ...

- learn to relax consciously
- increase your ability to concentrate
- improve your body tension and posture

Instructor: Sabine Kantorowicz

Monday, Gym or sports field

Football

Training—practice games—tournament: we play and train together. The most traditional ball sport is available to you in our Club Line. You can learn techniques, rules, game strategies and, most importantly, how to be dedicated in a team.

You will ...

- learn all the theoretical and tactical principles of this ball sport
- learn different playing techniques
- integrate into the team and develop your social skills

Instructor: Sayed Aboueninaga

Wednesday, Gym

Arts

In the Arts Club, you can discover the planks that make up the world. You will learn fundamental elements and techniques from circus, variety and acrobatic dance and develop your own artistic skills and styles.

You will ...

- learn various artistic disciplines, e.g. juggling, acrobatics or equilibristics
- practice your agility and your balance
- develop self-confidence and trust in others

Instructor: Vu Toan Le

Tuesday, Studio 2nd floor

Comics & Picture Stories

In this club you will learn to express a story in pictures and comics. You can use a variety of techniques to represent your image or story. In addition to paper, pen, paint and brush, we also use various applications on the iPad. You will learn different artistic styles of writing and design.

You will ...

- learn the basics of character design
- develop your own characters and comics
- design your own texts for your comic

Instructor: Janine Andrä

Wednesday, Studio 2nd floor (grades 4-6)

Graffiti

Berlin is world-famous for it and pieces of the walls of houses have made it into international galleries: Graffiti. In the Graffiti club you will become familiar with the art form of decorative lettering and painting pictures with a spray can.

You will ...

- properly learn important technical terms from the scene
- use different design materials (e.g. stencils, paste)
- apply different graffiti techniques

Instructor: Panterdesign

Thursday, Studio 2nd floor (grades 4-6)

Analogue and Digital Graphics

You will develop your own creativity. You will learn to digitise your most beautiful drawings on the computer and create new digital collages with image processing software. You will also learn to print your works on various materials such as stickers, textiles, posters and buttons.

You will ...

- learn to execute your ideas graphically
- become familiar with applications for image editing
- reproduce your artwork in different ways (stickers, posters, textile prints)

Instructor: Carla Romero

Monday, Studio 2nd floor

Painting and Drawing

Watercolour, school tempera paint, charcoal: in this club you learn how to paint and draw. You will learn about primary and secondary colours as well as their characteristics and effects. In addition, you will practice various basic creative techniques and execute your own image ideas.

You will ...

- know different drawing techniques and styles
- develop a feeling for colours, shapes and perspectives
- develop your own personal drawing style

Instructor: Mina Novic

Monday (beginner)

Thursday (advanced), Studio 4th floor

Pottery

In this club, you can get acquainted with techniques of plastic sculpting with clay. Initially, there will be an intense examination of the material and with time you will learn more and more construction techniques as well as coloured design.

You will ...

- implement various techniques of ceramic design
- develop a sense for shapes and functions of objects
- develop an aesthetic sensibility

Instructor: Detlef Pegelow

Tuesday

Photography

How does a camera work? What does aperture and shutter speed mean? In the photography club you will learn the basics and techniques of digital photography beyond selfies and snapshots. In image editing, you can learn how to change and enhance pictures.

You will ...

- learn to understand the operating principle of a digital camera
- improve your own photographic style
- edit images digitally

Instructor: Detlef Pegelow

Tuesday, Makerspace 4th floor

Textile Workshop

In this course you will gain basic experiences with needle and thread. You will learn which different textiles are available and how you can apply them. You can design your own pillow, cuddly toy, garment or similar and then make it yourself. In terms of creativity, the sky is the limit.

You will ...

- learn to sew by hand
- apply different tailoring techniques, e.g. taking measurements and cutting techniques
- create your own design and implement it

Instructor: Franziska Tenner

Thursday, Makerspace 4th floor

Makers - Tinkering & Building

Are you inventive and have great ideas? Design an aeroplane, build a brightly lit doll house or recreate the skeleton of a dinosaur: in this club you turn your own projects into reality. In addition to traditional craft techniques, you can also use modern tools such as 3D printers, electric motors or LED lights.

You will ...

- learn about basic mechanical and/or technical laws
- work solution-oriented on your project and not allow yourself to be discouraged by minor obstacles
- learn to structure yourself and your work

Instructor: Sven Wiesner

Wednesday, Makerspace 4th floor

Coding

In this club you will learn how to program step by step. In small projects you will use a simple programming language and familiarise yourself with many applications using digital gadgets and robots. Together we will develop small animations, computer games, sound generators and ingenious inventions for everyday life.

You will ...

- expand your mathematical-technical skills
- learn simple programming languages (e.g. Scratch)
- develop your own strategies and solutions to problems

Instructor: Christian Engelbrecht

Tuesday, Room 240

Chess

Are you interested in games requiring strategic thinking and concentration? Then chess is just the thing for you. In this club you learn how to play chess: How do the various figures move ? How do I set check? How does a game of chess work? You will practice foresight and focus. The club is also suitable for beginners.

You will ...

- learn the complex rules of the board game
- increase your ability to concentrate
- develop solution strategies and train your brain to think this way

Instructor: Frank Götze

Monday & Tuesday, Music room 2nd floor

Percussion/Drums

This course is about implementation of rhythms on drums. Initially you start with simple rhythmic exercises, which you will improve over time during the practice together to produce grooves.

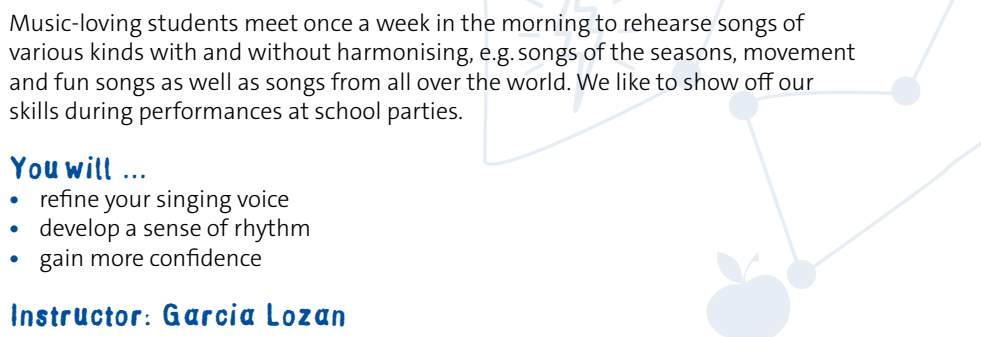

You will ...

- develop a feel for rhythm
- improve your coordination
- learn to adapt to the pace and rhythm of the group

Instructor: Igor Yakymenko

Thursday from 8:00-8:45 am, Music room 2nd floor

Choir

Music-loving students meet once a week in the morning to rehearse songs of various kinds with and without harmonising, e.g. songs of the seasons, movement and fun songs as well as songs from all over the world. We like to show off our skills during performances at school parties.

You will ...

- refine your singing voice
- develop a sense of rhythm
- gain more confidence

Instructor: Garcia Lozan

Monday, Room 249

Nature Lovers

In this club you will discover the diversity of flora and fauna and explore their natural habitats. You will learn how you can actively contribute to nature conservation. Furthermore, this club also offers room for the implementation of exciting projects, such as insect hotels and birdhouses.

You will ...

- expand your scientific knowledge in the field of flora and fauna
- develop an environmentally conscious attitude and actively engage in environmental protection
- implement your own nature projects

Instructor: tbd.

Monday, Room 225

Theatre Project is looking for actors!

Do you like standing on stage? Do you enjoy acting out various roles? You like to create stories? Or do you prefer directing?

Then this is the right place for you. In our course you will learn how to develop exciting roles and stories through improvisation and performance exercises.

We perform movement play and language games, do drama and improvisation exercises, work on roles and stage them.

In the end, we will stage the production of 'Hello Ruby' as a school performance. In this theatre project we will embark on a fantastic journey inside the computer.

You will ...

- get familiar with improvisational techniques
- learn how to interact with others
- develop speaking roles and scenes

Instructor: Sandra Buttstädt
